## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Wakabayashi et al. (US 6,568,668).

Wakabayashi et al. disclose a sheet folding apparatus comprising rotating folding rollers 671A, 671B, 676A, and 676B; reciprocatory pressing means 661; see figure 8. Rollers 671 comprise high (677A) and low friction regions; see figure 14. One of the paired rollers is made up of an elastomer while the other is metallic.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-5 and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wakabayashi et al. (US 6,568,668) in view of von Hein (US 5,007,891).

Wakabayashi et al. does not directly disclose rollers with non-circular sections or having one section narrower than the other however von Hein teaches rollers with non-

circular sections; see figures 2 and 3. It would have been obvious to one of ordinary skill in the art to substitute one of the rollers von Hein in the invention to Wakabayashi et al. in order to prevent slippage and provide relief.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
